

# Bouboulou Gold Concession

A NEAR SURFACE, ADVANCED-STAGE EXPLORATION TARGET  
LOCATED IN BURKINA FASO, WEST AFRICA

- The Bouboulou exploration permit covers an area of 38.8 square kilometers in Burkina Faso.
- Burkina Faso is the 4th largest gold producer in Africa.
- Gold mineralization was first identified on the Bouboulou area by Boliden in 1997 where a Regional Rotary Air Blast drilling program outlined a broad north-east trending gold anomaly measuring 13km by 2 km over what is now the Bouboulou permit. The concession was then explored by Riverstone Resources and Roxgold Inc (TSX.V: ROG).
- Highlights of surface exploration programs include; surface rock sampling and trenching returning gold grades from 1.09 to 19.16 g/t gold. Four zones of gold mineralization have been identified on the property termed Koala, Rawema, Bouboulou 2 and Pelgtanga.
- Roxgold later completed reverse circulation (RC) and diamond drilling (DD) to test the four mineralized zones.

Drilling highlights from each of the four zones:

## *Reverse circulation drilling*

Hole	azimuth	dip	depth(m)	From	To	(metres)	(g/t Au)	Zone
BBL-11-RC-006	120	-67	115	70	110	40	1.548	Bouboulou2
			includes	70	90	20	2.255	
			and	100	110	10	1.422	
BBL-11-RC-013	300	-50	109	74	109	35	2.209	Rawema
			includes	74	86	12	5.455	
BBL-11-RC-020	270	-55	103	40	50	10	2.844	Koala
			includes	42	44	2	12.450	
BBL-11-RC-027	120	-45	120	90	114	24	1.36	Bouboulou2
BBL-11-RC-042	320	-55	114	52	54	2	3.80	Pelgtanga

## *Diamond drilling*

Hole	azimuth	dip	depth(m)	From	To	(metres)	(g/t Au)	Zone
BBL-11-DD-002	315	-45	127	42	44	2	5.43	Rawema
BBL-11-DD-003	135	-45	142	56	58	2	5.33	Bouboulou2
				78	82	4	12.53	
BBL-11-DD-005	300	-50	179	74	80	6	4.62	Rawema
			includes	77.7	78	0.3	81.32	
BBL-11-DD-008	320	-45	198	125	127	2	2.55	Koala

# Summary & Work Program

- These results verify that zones of potentially economic gold mineralization exist on the property. The goal of the 2016 exploration program is to establish continuity of these zones and to extend them.
- The initial program will consist of 2000 meters of diamond drilling to a maximum depth of 200 meters.
- Nexus Gold Director, Warren Robb, P.Geo, was Chief Geologist for Roxgold in 2012, where he wrote the 43-101 on the property. Mr. Robb will plan and implement the Nexus Gold drill program at Bouboulou.

## Share Structure

TSX.V-NXS

(Current as of July 21<sup>th</sup>, 2016)

**Common Shares:** 62,964,748

<b>Warrants:</b>	<u>Amount</u>	<u>Price</u>	<u>Expiry</u>
